LARGE IMPORTS OF RAW MATERIALS.

American Manufacturers Have Had a Very Busy Year So Far.

BIG INCREASE IN QUANTITIES.

Whatever May Be Conditions in Other Parts of the World, the United States Cannot Complain.

The Republic Bureau, 14th St. and Pennsylvania Ave. Washington, Nov. 16.—The activity of American manufacturers shows no signs of abatement, whatever the conditions in other countries. At least, this appears to be true, measuring the activity of manufacturers by their demand for raw material from other parts of the world, which enter into their great industries.

The recent figures of the Treasury Bu-

reau of Statistics show that the importation of manufacturing materials during the nine months ending with September, 1961, were not only larger than those of last year, but larger than those of any year in the history of our commerce and industries. A detailed examination of imports of manufacturers material in the first nine months shows an even larger increase in 1901 than is indicated by the figures above mentioned.

While the total imports of manufacturers'
makeful in the nine months ending with
September, 1901, exceed in value by \$4,000,000 those of the corresponding nine months of 1990, the actual increase in quantity is probably considerably greater than that indicated by the statements of values simply. This is due to the fact that there has been during the last year a marked decrease in the prices of the principal articles imported for use in manufacturing, and, therefore, while the figures of value show a material increase, those of quality show an even greater increase.

The importations of manufacturers' ma-

greater increase.

The importations of manufacturers' material are largely made up of six great articles—India rubber, slik, fibers, hides and akins, tin for use in manufacturing tin plate and chemicals for use in the manufacturing industries. In nearly all of these prices per unit of quantity in 1201 are less than those of 1809.

Large Increase in Quantity.

In raw slik, for instance, the value of the importations of the nine months ending with September, 1801, is 125,271,299, against 235,250,77 in the corresponding months of least year, the increase in value being very slight; but the number of pounds imported in the nine months ending with September, 1901, is 8,64,524 against 6,561,839, an increase of about 30 per cent in the quantity imported.

In fibers the figures of value show a slight decrease, while the quantity shows an increase, the value being in the nine months ending with September, 1901, is 259,901, against 251,561,841; while the quantity was 129,822 tons against 157,575 tons.

In crude rubber this is also true. The value of rubber importations is 129,889,079, against 251,659,660, while the quantity is 60,681,060 pounds, against 34,623.37, an increase of more than is per cent. In pig tin the same improvement in price is noted, the value of the imports in 1901 being 51,677, against 251,659,661,871; while the quantity is 60,680,801 pounds, against 54,847,417 pounds.

Taking into correlevation the two great facts. First, that the value of manufacturers' materials imported in 1901 is greater than in the corresponding months of any preceding year, and second, that the prices of this material are lower, and that therefore, this increased value means a still greater increase in quantity, the conclusion seems to be justified that the activity of American manufacturers in other parts of the world.

RAN INTO A MILK TRAIN.

Fatal Collision on the Chicago

The through train from St. Paul, due to arrive in Chicago at 9:30 a. m., ran into a milk train, telescoping two coaches.

A little girl from Syracuse was instantly tilled and five other passengers injured. Immediately after the collision the milk train coaches caught fire and were entirely consumed.

Detroit Club Transfer Completed. Detroit Club Transfer Completed.

Detroit, Nov. 16.—George T. Stallince's equitable interest in the Detroit Baseball Club was purchased to-day by the club's new owners at a price satisfactory to him. No figures are given out. It is expected that the small block of stock owned by John Fitzpatrick of this city will also be purchased by Mesars. Angus, Doyle and McNamara, who will then become equal partners in the club.

THE RIGHT THING.

A New Catarrh Cure, Which Is Rapidly Coming to the Front.

For several years Eucalyptol Guatacol and Hydrastin have been recognized as standard remedies for catarrhal troubles, but they have always been given separately and only very recently an ingenious chemist suc-

other antiseptics, into a pleasant, effective tablet.

Druggiets sell the remedy under the name of Stuart's Catarrh Tablets, and it has met with remarkable success in the cure of masal catarrh, bronchtsl and throat catarrh and in catarrh of the stomach.

Mr. F. N. Benton, whose address is care of Clark House, Troy, N. I., says: "When I run up against anything that is good I like to tell people of it. I have been troubled with catarrh more or less for some time. Last winter, more than ever. Tried several so-called cures, but did not get any benefit from them. About six weeks ago I bought a 50-cent box of Stuart's Catarrh Tablets and am glad to say that they have done wonders for me, and I do not hesitate to let all my friends know that Stuart's Catarrh Tablets are the right thing."

Mr. Geo. J. Casanova of Hotel Griffon, West 9th street, New York City, writes: "I have commenced using Stuart's Catarrh Tablets and already they have given me better results than any catarrh cure I have ever tried."

In an effort to liquidate an indebtedness of \$11,000, the members of the St. Louis German Protestant Orphan Aid Society have arranged to hold a fair and bazaar on Wednesday evening and Thursday and Friday afternoons and evenings, November 29, 21 and 22, at the Northwest Turn and Lie-Great Western.

Chicago, Now. 19.—One passenger was killed and five injured by a rear-end collision on the Chicago Great Western road independent of the collision on the Chicago Great Western road to-day pear St. Charles Station.

During the forty-three years of its exist-

ence the home has accomplished much for little children bereft of the care and protection of parents and some of the substantial merchants of to-day in St. Louis and other cities received their early training at this institution. At present there are more than 325 children at the home, and to each of them is given a careful and practical education, calculated to fit the child to become a useful citizen.

The amount necessary to maintain the home annually is about \$15,000, and the cost is constantly increasing as the number of inmates grows. the home has accomplished much for

is constantly increasing as the number of inmates grows.

The arrangement for the fair and bazaar are in the hands of an executive committee composed of the following gentlemen: W. E. Hees, G. H. Wetterau, H. C. Kraleman, J. Field, F. W. Wrieden, Casper Kraieman, Henry Holer, Theo, Herzog, Frank Astroth, George Diedrich, Rudolph Schellhammer, A. M. PRINCESS CHIMAY VERY ILL. Throat Swollen to Twice Its Normal Size-Diagnosis Difficult.

Paris, Nov. 16.—Princess Chimey, formerly Clara Ward of Detroit, Mich., whose sensachara ward of Detroit, Mich., whose sensa-tional elopement with an itinerant gypsy fiddler some years ago caused a sensation, is lying seriously ill at a hotel here. Janos Rigo, the fiddler, is with her. In speaking of the Princess's illness to-day, he said:

"Three physicians are attending the Prin-cess. Her condition is critical. The nature of her disease is uncertain. The head to of her disease is uncertain. The throat is swollen to twice its normal size."

TAR EXPLOSION STARTS FIRE. One Man Badly Hurt and Much Damage Done.

Topeka, Kas., Nev. 18.—A special to the State Journal from Newton, Kas., says: A direstrous fire which started in the Newton lumber yard at 10:45 o'clock to-day did \$150,000 damage. The fire was caused by the spontaneous Newton immer yard at 10.50 contained a 10.50 combustion of a barrel of tar.

J. Stein, an employe, was badly injured by the explosion and will probably die.

The principal losses are the Newton lumber yard and the Phillips building, occupied by Duff & Duff as a furniture store.

ASCENSIONS WERE A SUCCESS Good Weather Favored United

Kingdom Aero Club. London, Nov. 15.—Under a remarkably cloudless, winter sky, the first ascent of the Aero Club of the United Kingdom was made from Stamford Bridge grounds.

The ascensions of the various aeronauts were fairly successful, no accidents marring the initial enterprise of the club.

RARE BRIGHTNESS

Astronomer Larkin Describes Results of His Observations at Mount Lowe.

Los Angeles, Cal., Nov. 16,-The following description of the shower of leonids as seen from Mount Lowe is furnished by Edgar L. Larkin, director of the Mount Lowe Observatory: "The first meteor was seen at 11:50

o'clock, and during the five minutes to midnight four were seen, and 653 from midnight to 5:40 o'clock Friday morning. "They all seemed to emerge from within the cycle of the zodiacal constellation Leo. it, but their bright tracks pro ward would converge there.

ward would converge there.

"Many were of great brilliancy—many times brighter than Venus. They were all white but thirteen, which were tinged with red, and two, which ware quite red. About half of them left long, luminous streaks, which remained from half a minute to the usual length of twenty-four minutes.
"Meteor No. 22 was perhaps, the bright-

usual length of twenty-four minutes.

"Meteor No. 229 waz, perhaps, the brightest that passed the zenith. It was remarkable in brilliancy, and width of trail. Its solid portions were dissipated with cosmic dust by friction against the air, and, therefore, did not explode.

"The meteor vanished into the trail midway beween Orion and Taurus. The disruption of the glowing stream was at the star P Oronis. The detached mass moved to Aide-Oronis. The detached mass moved to Aldebaran, eight degrees, where it became faint and disappeared in the brilliancy of that first magnitude."

HIGHWAYMEN WERE SOCIAL.

Albert Arnold Robbed Twice in Fifteen Minutes.

Albert Arnold of Madison, Ill., was robbed twice within afteen miutes by highwaymen in this city early resterday morning. He went into Huibert's saloon at No. 500 Wainut street about midnight. There he fell in with four strangers, who became quite congenial and were giad to drink with him. While they were shaking dies one of the men reached into Arnold's pocket and took it. He then disappeared. Arnold complained to the other three men, who promised forthwith to find the robber and recover the money. They led him to the mouth of the alley on the south side of Wainut street, between Tenth and Eleventh streets, where they assaulted him and took 4.60, all the money he had left. While one of them gave him the "strong arm" the others searched his pockets.

Arnold complained to the police, furnishing them with descriptions of the men, but no arrests have been made.

TRAIN AND ENGINE MET. Two Killed and Several Injured in Collision.

Boise, Idaho, Nov. 16.—By a collision at a o'clock this morning on the Oregon Short Line, near Orchard, between an easthound freight train and a westbound helper engine, two trainmen lost their lives and three were injured.

The dead are: Charles Wallace, head brakeman on the freight train, and Martin Cosgrove, engineer on the freight, the latter being terribly scalded, and dying half an hour after being brought to this city.

The injured: H. W. Knox, fireman on freight, right leg out off, will probably recover; Eph. McDowell and Frank Oman, engineer and fireman on the helper, bruised and cut, but not seriously.

Ten cars were wrecked.

WILL VISIT THE PRESIDENT.

BREAKERS AHEAD FOR HANNA'S PLAN.

Strongest Opposition to Ship-Subsidy Legislation Is in His Own Party.

REPUBLIC SPECIAL Washington, Nov. 16.—Senator Hanna of Ohio, who is one of the chief advocates of ship-subsidy legislation, again finds the strongest opposition in his own camp. Conssman T. E. Burton of Cleveland, Hanna's home city, returned to the capital today entertaining more strongly than ever his old feeling against the shipping measure. And inasmuch as Mr. Burton will again father the river and harbor bill, the history of the last session may be repeated in the defeat of the pet schemes of both Mr. Han-

In speaking of the subsidy bill Mr. Burton said to-night:

"I am opposed to the measure just as I was last winter. In the first place I do not believe in the principle, I do not believe it would be permanently effective in building up our merchant marine nor that benefits would accrue in the way of reduced freight rates for our agricultural and other products."

na and Mr. Burton.

sidy bill. It falled also to pass a river and harbor bill. The defeat of the latter meas-ure was attributed to the failure of the

former. It was believed then and is believed now that the opposition to the measure which bore Mr. Burton's name would have passed had fatal opposition not developed against the subsidy bill.

Early in the coming session a new subsidy bill will be introduced by Senator Frye of Maine. Its basic principle will be identical with that of the old bill. As a consequence of Mr. Burton's opposition to subsidies Mr. Hanna may stand in the way of river and harbor legislation.

OPPOSE SHIP-SUBSIDY BILL Knights of Labor Denounce Frye

Hanna-Payne Measure.

Hanna-Payne Measure.

Indianapolis, Ind., Nov. 18.—The General Assembly, Knights of Laber, to-day devoted most of an afternoon session to consideration of a resolution, introduced by a seaboard delegate, denouncing the Frye-Hanna-Payne subsidy bill, now pending in the United States Senate.

It was bitterly opposed by six members, including I. D. Chamberlain of Colorado, and was referred to a Committee on Legislation, who reported it back unchanged, when it was adopted by an aimost unantimous vote. The resolution is as follows:

"Resolved, That the development of an American merchant marine is greatly desired; that we believe American bottoms, built in American ship yards, by American mechanics, at wages commensurate with the American standard of living.

"Resolved, That the present bill pending in the United States Senate, known as the Frye-Hanna-Payne subsidy bill, is not drawn in the interests of the American ship yards, nor American laboring people, and, therefore, the Knights of Labor oppose its enactment, believing that some measure can be, and should be, presented that will encourage the building of ships by American citizen seamen, which should meet the approval of the whole people."
